SUBJECT INDEX

Acceptability of dry fermented sausage, effect of casing 83
Alcoholic distilled drinks, reduction of methanol content 241
Amino changes in sardines on storage 297
Amorphous state of sucrose solutions on freezing 553
Animo acid changes in sardines on storage 297
Automated turbidometry for quality control 325

Bakers yeast viability measurement 307
Beef, effect of CO2 or vacuum packaging on shelf-life 641
Beef, effect of packaging on colour and micro-organisms 641
Beef, high and normal pH, effect of packaging on shelf-life 641
Beef, on-line measurement of fat and lean in carton 683
Beef, pigments, effect of packaging and frozen storage 629
Brassica campestris var. *Toria* 53
BSA, effect of amidation on foaming and other properties 385
BSA catalysis of sorbic acid-thiol reactions by 381
B-Vitamins enrichment in Kefirs 423

Cake mixes water vapour sorption isotherms 91
Calibration in water activity measurement 111
Canning temperature measurement, thermocouple errors 409
Capillary rheometer measure of soy-protein isolate melt 45
Capillary viscometry of soy-protein melt 567
Carthamin, thermal stability of colour, pH effects 21
Carthamin bound to insoluble polymers 21
Carthamin tinctorius L. 21
Casing type, effect on attributes of dry fermented sausage 83
Casing type, effect on ripening of dry fermented sausage 83
Cassava semolina, adsorption isotherm to predict shelf-life 583
Chemical modification of protein, effect on functional properties 385
Chicken bone, ESR detection of irradiation 669
Chill injury, mango, edible wild 337
Choline plasmalogen 363
Citrus cloudy drinks, stability of 259
Coffee, instant, sensory testing 429
Comminuted particle size distribution 65
Compliance testing for fat content of boneless beef 683
Compressive force of thawed sea scallop meat 207
Conduction errors in thermocouples in conduction heating 409
Cookie quality, effect of safflower protein isolates 39
Cooking loss prediction in poultry meat slurry 373
Cryoprotectants in surimi 185
Crystostabilization of sucrose solutions 553
Cultured milk, B-vitamin enrichment 423

Dehydrated carrots drying profile measurement in 173
Design parameters in meat flaking 65
Double-disk wet attrition milling of soy-bean 575
Drip loss in frozen sea scallops 695
Drying-rate curves for sweet potato 99
DSC detection of irradiated foods 165
DSC of fish myofibrils 283

Elasmobranch fish processing 211
Electron beam irradiation of chicken 669
Emulsion stability 259
End-effect correction for extrusion viscometer 567
Enthalpy change with aperture size and cutting station number 65
Entrance-correction for extrusion viscometer 567
Enzyme inactivation: mathematical models — review 1
Enzyme inactivation: thermodynamics, kinetics 1
Enzyme stability 1
Enzyme structure 1
Epifluorescence microscopy 325
ESR signal in irradiated bone, dose rate and storage 669
Ethanolamine plasmalogen 363
Extrusion cooking of lung protein; optimization by RSM 403
Extrusion cooking properties, soy-protein isolate 45
Extrusion viscosity of soy-protein melt 567

Fat content of beef in carton — on line measurement 683
Fatty acid/aldehyde composition of muscle phospholipids 363
Fermentation of soybeans — oligosaccharide breakdown 595
Fermentation of soybeans — organic acid changes 607
Fermented sausage, effect of casing or ripening and acceptability 83
Fish myofibril thermal stability by DSC 283
Fish myofibrils from cold- and warm- water fish 283
Fish phospholipids 363
Flaked meat, effect of temperature on particle site distribution 65
Flaked meat, particle size distribution 65
Flavour-influence of enzymes 1
Flow behaviour of aqueous soy-protein isolate melt 45
Flow properties of soy-protein melt 567
Fluorimetry for rapid prediction of poultry meat skin content 373
Foaming and physico chemical properties of amidated BSA 385
Foaming enhancement by partial amidation of BSA 385
Food colour, insoluble polymer-bound carthamin 21
Free choice profiling of irradiated chill-stored turkey breast 653
Freezing beef, effects on muscle pigments 629
Freezing behaviour of sucrose solutions 553
Freezing sea scallops, effects on quality 695
Freezing temperature, effects on beef pigment 629

Functional properties of extruded lung protein 403
Functional properties of poultry meat slurry, rapid analysis 373
Functionality of BSA, effect of amidation 385

GAB equation prediction of shelf-life of packaged gari 583
Gamma irradiated food, detection methodology 669
Gamma-irradiation plus ice storage, effect on fat oxidation in fish 39
Gari, adsorption isotherm to predict shelf-life 583
Gel consistency of rice 153
Gelatinization temperatures of rice 153
Glass transition of freezing sucrose 553
Grape skins, effect on methanol content of spirits 241
Gum arabic — gum-based cloudy drinks 259
Gum elemi — gum-based cloudy drinks 259

Hard-to-cook soy beans, effects of soaking and splitting 117
Heat penetration in cans, thermocouple errors 409
Heat processing: enzyme inactivation — review 1
Heat-treated reconstituted skim milk, age gelation 27
Heat-treated reconstituted skim milk, hexametaphosphate treatment 27
Heat-treated reconstituted skim milk, shelf-life 27
Hot-air drying, modelling in sweet potato slices 99
Hydration state measurement by NMR 173
Hydrostatic pressures in wet-grinding soy-bean 575

Ice storage plus irradiation, effect on fat oxidation in fish 397
Ice-content of flaked meat, effect on particle size 65
Interactions of components of aw 91
Intermediate moisture foods, non-enzymic browning 157
INT-2-(p-iodophenyl)-3-(p-nitrophenyl)-5-phenyltetrazolium chloride 3
Ipomoea batatus, hot air drying 99
Irradiated chicken, effect of dose rate, storage on ESR signal 669
Irradiated foods, detection by increased supercooling 165
Irradiation of chill-stored turkey breast fillets 653
Irvingia gabonesis 337
Isoprotein composition of thaumatin 271
Isoprotein cross-linking of thaumtin 271
Isoprotein modification by tyrosinase or dimethyl suberimidate 271

Kefirs from different species milk, vitamins in 423

Lipid degrading enzyme inactivation 1
Lipid oxidation in undermilled rice 615
Liquid-state non-enzymic browning 157

Low-calorie cryoprotectants in surimi 185
Lung protein, optimization of extrusion cooking 403

Mango, edible wild, composition; ripening, sensory quality 337
Meat phospholipids, fatty acids and aldehydes 363
Meat products, water activity measurement 111
Metabolism of organic acids in soybean fermentation 607
Methanol content reduction in Greek distilled drinks 241
Micellar catalysis of sorbic acid-thiol reactions 381
Microbial formation of organic acids from soybeans 607
Microbial metabolism of oligosaccharides from soybean 595
Microbial quality of ultrasound imaging 325
Microbial quality — aseptic pack starch soup 313
Microbial quality — rapid methods 325
Milk, UHT reconstituted, proteolysis 27
Milk, UHT reconstituted, sedimentation 27
Milk, UHT reconstituted, shelf-life 27
Milks from different species, vitamins in Kefirs 423
Milling, effect on lipids and sensory attributes of rice 615
Milling soy-bean by wet grinding 575
Modelling thermocouple conduction errors 409
Modelling wet-grinding of soy-bean 575
Molten soy-protein, viscous flow properties 567
Mould penetration of sausage casing 83
Multiple comparison test for product variability testing 429
Muscle phospholipids 363
Muscle pigments, effects of partial freezing and storage 629
Myoglobin, effects of partial freezing and storage 629
Myrosinase inactivation 53

Non ionic surface catalysis by protein 381
Nondestructive testing for microbial quality 325
Non-enzymic browning, role of sorbic acid 157
Non-protein nitrogen in canned ray flesh 211
Noodle quality measurement 133
Nucleophilic reaction catalysis by BSA micelles 381

Off-flavour in canned ray 211
Offal processing by extrusion cooking 403
Off-flavour in undermilled rice 615
Off-odours of irradiated chill-stored turkey breast 653
Oligosaccharide breakdown during soybean soaking 595
On-line measurement of fat in beef in carton 683
On-line process analysis/product property prediction 373
Opacity of gum-based cloudy drinks 259
Orange oil cloudy emulsions based on gums 249

Organic acid formation during soybean soaking 607
Oryza sativa in lipids and sensory attributes on, under milling 615
Oryza savita L. 153
Ouzo, reduction of methanol content 241
Oxidative rancidity, effect of irradiation in fish 397

Packaging beef in film, effect on muscle pigment 629
Packaging effects on sensory quality of irradiated turkey 653
Packaging – CO2 or vacuum – effect on beef shelf-life 641
Page equation for modelling hot-air drying 99
Pasta quality measurement, chemical, physical and sensory methods 133
Pasta quality prediction 133
Pears, Conference, unripe, packaging effects 215
Pears, control of ripening 215, 225
Pears, Doyenne du Comice, packaging effects 225
Pears, modified atmosphere retail packaging 215, 225
Peroxidase inactivation 1
Phase transactions on freezing sucrose solutions using DSC 553
Physico-chemical quality attributes of rice varieties 153
Phytic acid extraction 53
Placopecten magellanicus 207
Placopecten magellanicus, effect of on ship handling on sensory quality 207
Polyethylene packaged gari, water activity 583
Precautions in water activity measurement 111
Process lethality estimation in canning 409
Product variability testing using multiple comparison test 429
Protein, isoelectrically precipitated, effect on cookie quality 27
Protein, micellized, effect on cookie quality 39
Protein adsorption on orange oil droplets 259
Protein as non-ionic surface catalyst of sorbic acid-thiol reaction 38
Protein enrichment of cookies, effect on quality 39
Protein functional properties in frozen cod surimi 185
Protein solubility – minimising loss 53
Protein stability of fish myofibrils 283
Protein sweetener 271

Quality control of soups 325
Quality measurement in pasta 133
Quartz rod fluorimetry for rapid analysis of poulty meat 373

Raja radiata 211
Rapeseed, glucosinolate extraction with water 53
Rapid method for yeast viability 307
Rapid non-destructive testing of fat cartoned beef 683
Rapid on-line analysis in industrial vegetable drying 173
Rapid on-line analysis of poultry meat slurry 373

Rastrelliger konagurta, effect of irradiation on fat oxidation 397
Ray flesh, loss of urea in canning 211
Red meat phospholipids 363
Red natural food colour-carthamin 21
Redundancy analysis of milled rice attributed 615
Reflectance colour, change in CO_2 and vacuum packaged beef 641
Respiration of mango during ripening 337
Response surface methodology for optimization of extrusion 403
Retail packaging for pears 215, 225
Rheology of soy-protein isolate melt 45
Rice, eating quality 153
Rice varieties quality attributes of 153
Rice-changes in lipids and sensory attributes on, under milling 615
Ripening control in pears 215, 225
Ripening methods for mango 337

Safflower-protein isolates, effect on cookie quality 39
Salami, fuet, effect of casing 83
Sardina pilchardus, storage changes at 25° and 0°C 297
Sardine, amino acids and biogenic amine changes 297
Sardine, bacterial changes on storage 297
Sausage, dry fermented, effect of casing 83
Scomberomorus guttatus, effect of irradiation on fat oxidation 397
Scombrotoxins in sardines 297
Sea scallop, effects of on-ship handling on sensory quality and yield 695
Sea scallop meat, physical and sensory measures of texture 207
Sensory analysis of undermilled rice 615
Sensory measurement of product variability 429
Sensory quality changes in sea scallops 695
Sensory quality control 429
Sensory quality of dry fermented sausage 83
Sensory quality of pears 215, 225
Shear characteristics of soy-protein melt 45
Shear force of thawed sea scallop meat 207
Shelf-life, dry cake-mix storage 91
Shelf-life extension in fish by -irradiation 397
Shelf-life extension in pears 215, 225
Shelf-life of reconstituted UHT skim milk 27
Skim milk, UHT reconstituted, age gelation 27
Skin content of poultry meat slurry by fluorimetry 373
Skin injury in MAP pears 215, 225
Softening of soy beans, effect of presoaking 117
Softening of soy beans, two-substrate theory 117
Solid-state non-enzymic browning 157
Sorbic acid, role in non-enzyme browning 157
Sorbic acid-thiol reaction, catalysis by BSA 381
Soup quality control 315, 325
Soy beans, effect of presoaking on softening on cooking 117

Soy beans, effect of presoaking on thermal softening 117
Soy protein-based cloudy orange drink 259
Soybean soaking for tempe-changes in organic acids 607
Soybean soaking for tempe-changes in carbohydrates 595
Soy-bean, hydrostatic pressures in wet grinding 575
Soy-protein isolate, effect of water content on melt flow 45
Soy-protein isolate, effect on cookie quality 39
Soy-protein melt viscosity, flow behaviour 567
Spoilage in sardines 297
Spoilage of CO_2 and vacuum packaged beef 641
Spore detection in soups 325
Stability of gum-based cloudy drinks 259
Starch gelatinization in gari, water activity 583
Sucrose solutions — amorphous state and delayed ice formation 553
Supercooling increase in irradiated foods 165
Surimi, effect of low/non-sweet additives on protein properties 185
Surimi: gel-forming properties of 185
Surimi; texture of 185
Sweet potato slices, modelling of hot-air drying 99

Tempe production — changes in carbohydrates on soybean soaking 595
Tempe production — changes in organic acids during soybean soaking 607
Tempering phase measurement in carrots by NMR 173
Texture changes in sea scallops 695
Texture of thawed sea scallop meat 207
Texture-related enzyme inactivation 1
Thaumatin oligomers 271
Thawing onset temperature reduction in irradiated food 165
Theoretical design for instrument to measure fat/lean in beef 673
Thermal denaturation temperature of fish myofibrils 283
Thermal inactivation of enzymes 1
Thermal processing, thermocouple conduction errors 409
Thiol-sorbic acid reaction, catalysis by BSA 381
Tsicoudia, reduction of methanol content 241
Tsipouro, reduction of methanol content 241
Turkey breast — effects of irradiation and packaging on sensory quality 653

UHT — processed reconstituted concentrated skin milk-gelation 27
Urea loss on canning ray flesh 211

Video image analysis of flaked meat 65
Viscosity of freezing sucrose solutions 553
Volatile fatty acids in soybean soaking 607

Waste utilization of lung protein by extrusion cooking 403

Water activity, effect on non-enzymic browning 157
Water activity and shelf-life of cassava semolina 583
Water activity measurement with electric hygrometer 111
Water activity prediction of mixture from components 91
Water equilibration measurement by NMR in carrots 173

Yeast viability measurement using INT 307
